Gross Description

- A. Received in formalin labeled with the patient's name and "left pelvic lymph nodes" are multiple fibrofatty tissues measuring 3.5 x 3.5 x 3 cm in compact aggregate. A dominant area of induration is bisected in A1. A second area of induration is bisected in A2. Four smaller areas of induration submitted in A3.
- B. Received in formalin labeled with the patient's name and "right pelvic lymph nodes" are pieces of fibroadipose tissue measuring 3 x 3 x 2 cm in compact aggregate. A dominant area of induration submitted in B1-B2. The remaining nodular lesions are submitted in B3.
- C. Received in formalin labeled with the patient's name and "left distal ureter-FS" is a yellow-tan tissue measuring 3 x 3 x 1 mm. The specimen is totally submitted in C1.
- D. Received in formalin labeled with the patient's name and "right distal ureter-FS" is a yellow-tan tissue measuring 4 x 1 x 0.5 mm. Totally submitted in D1.
- E. Received in formalin labeled with the patient's name and "neurovascular bundle-FS" is a yellow-tan tissue measuring 5 x 4 x 2 mm thick. Totally submitted in E1.
- F. Received in formalin labeled with the patient's name and "bladder, prostate, seminal vesicles and distal ureters-NFS" is a specimen so designated measuring 13 cm superior to inferior, 12 cm right to left and 8 cm anterior to posterior. The included prostate measures 5 cm superior to inferior, 5 cm right to left and 5.5 cm anterior to posterior. The bladder cavity is contracted measuring 2.5 cm superior to inferior, 2.5 cm right to left and 2.5 cm anterior to posterior. The bladder wall appears indurated with a conspicuous palpable indurated midline projection superiorly measuring 3 x 2 x 1.5 cm. The right and left vas deferens project along the posterior bladder wall for 4 cm on the right and 2.5 cm on the left. The right and left seminal vesicle area is effaced by pronounced induration continuous with the bladder wall. The right and left ureter stubs appear deeply retracted. Section code: F1= left vas resection margin; F2= right vas resection margin; F3= shave distal prostatic resection margin; F4-F6= mid posterior prostate; F7-F9= posterior superior prostate; F10-F13= left seminal vesicle in continuity with prostate and posterior surgical margin; F14-F17= right seminal vesicle continuous with

prostate and inked posterior margin; F18-F19= sections of previously described tumor projecting from superior aspect of bladder; F20= left anterior prostate; F21-F23= left lateral bladder wall extensively sampled inferior to superior; F24= right anterior superior prostate; F25-F30= right lateral bladder wall extensively sampled inferior to superior.
