Source of Specimen

- A. LEFT PELVIC LYMPH NODES-
- B. RIGHT PELVIC LYMPH NODES-
- C. BLADDER PROSTATE SEMINAL VESICLES VAS DEFERENS-
- D. LEFT URETER MARGIN IS INKED FS-
- E. RIGHT URETER MARGIN IS INKED FS-
- F. LEFT URETERMARGIN #2 FS-
- G. LEFT URETER MARGIN #3 FS-

ICD-03
Carcinoma, urothelial NOS
8/20/13
Site: Trigone of bladder
C67.0
JW 7/24/13

FINAL DIAGNOSIS:

- A. LEFT PELVIC LYMPH NODES-
NO TUMOR SEEN IN 9 OF 9 LYMPH NODES.
- B. RIGHT PELVIC LYMPH NODES-
METASTATIC CARCINOMA SEEN IN 1 OF 5 LYMPH NODES.
- C. BLADDER PROSTATE SEMINAL VESICLES VAS DEFERENS-
INVASIVE CARCINOMA, HIGH GRADE.

TUMOR SITE: LEFT TRIGONE, URINARY BLADDER.

HISTOLOGIC TYPE: UROTHELIAL.

SQUAMOUS DIFFERENTIATION: EXTENSIVELY PRESENT.

GLANDULAR DIFFERENTIATION: NOT PRESENT.

TUMOR SIZE: 2 CM.

HISTOLOGIC GRADE: 3/3.

Prepared for

EXTRAVESICULAR MASS: MACRO-SCOPICALLY PRESENT.

SPECIMEN TYPE: RADICAL PROSTATECTOMY/ CYSTECTOMY

TNM STAGE: pT3b, pN1, pMX.

(T3a: microscopically; T3b, macroscopically)

(N1, single pelvic node; N2, multiple pelvic nodes; N3, common iliac node)

LYMPH NODE(S) INCLUDED IN ALL PARTS: NUMBER INVOLVED : 1

NUMBER EXAMINED: 14

LYMPHATIC (SMALL VESSEL) INVASION: IS SEEN.

ASSOCIATED EPITHELIAL LESIONS: NOT IDENTIFIED.

NO TUMOR SEEN AT MARGIN(S).

D. LEFT URETER MARGIN IS INKED FS-
TUMOR PRESENT.

E. RIGHT URETER MARGIN IS INKED FS-
NO TUMOR SEEN.

F. LEFT URETER MARGIN #2 FS-
DYSPLASTIC UROTHELIUM.

G. LEFT URETER MARGIN #3 FS-
NO TUMOR SEEN.

BLADDER CANCER

Gross Description

- A. Received in formalin labeled with the patient's name and "left pelvic lymph nodes" are two nodules of tan, fatty tissue. The largest has an elongated configuration measuring 6 x 1 x 1 cm and the second measuring 0.5 cm. The excess fat is trimmed and the two nodes are submitted in A1-A2, each containing one lymph nodes that has been bisected.
- B. Received in formalin labeled with the patient's name and "right pelvic lymph nodes" are four nodules of tan, fatty tissue consistent with lymphoid tissue measuring from 1 cm down to 1.5 cm. Excess fat is trimmed and all four nodes are submitted as follows: B1-B2=one lymph node; B3=two lymph nodes.
- C. Received in formalin labeled with the patient's name and "bladder, prostate, seminal vesicles, and vas deferens" is a radical cystectomy specimen with attached fat. Overall dimensions measure 15 x 8 x 6.5 cm. The attached prostate measures 4 x 3.5 x 3.5 cm and has a shaggy capsule. The specimen is inked black on the left and blue on the right. The right seminal vesicle measures 4 x 1 x 1 cm. The left vas deferens measures 10 cm in length. The right seminal vesicle measures 4 x 1 x 1 cm. The right vas deferens measures 11 cm in length. The left and right ureters are retracted in the fat and have been previously taken for frozen section evaluation. The bladder is opened anteriorly, and in the left trigone the mucosa is remarkable for a 2 x 1.5 x 1 cm deep ulcerated mass. The remainder of the bladder mucosa has a cobblestoned, edematous appearance. The cut surface of the mass has an indurated, firm appearance and grossly appears to have invaded into the fat. The left lateral wall is sectioned to reveal a normal-appearing parenchyma. The right lateral wall on cut surface also has a grossly unremarkable appearance. The cut surface of the prostate reveals a tan-pink, nodular appearance, with the right side parenchyma also revealing embedded, calcified structures. Representative sections of the specimen are submitted as follows: C1=prostatic urethral margin; C2-C5=entire lesion left trigone; C6-C7=left posterior wall; C8-C9=left lateral wall; C10=left dome; C11-C12=right trigone; C13-C14=right posterior wall; C15-C16=right lateral wall; C17=right dome; C18-C21=full thickness cross sections of upper, mid, and lower one-third of prostate left side; C22-C25=representative sections of upper mid and lower one-third of prostate right side.
- D. Received in formalin labeled with the patient's name and "left upper ureter margin FS" is a 1 cm frozen section tissue remnant, entirely submitted in D1.
- E. Received in formalin labeled with the patient's name and "right ureter margin FS" is a 1 cm frozen section tissue

Prepared for:

remnant. Wrapped and submitted in E1.
 F. Received in formalin labeled with the patient's name and
 "left ureter margin #2 FS" is a 1 cm frozen section tissue
 remnant. Wrapped and submitted in F1.
 G. Received in formalin labeled with the patient's name and
 "left ureter margin #3 FS" is a 1 cm frozen section tissue
 remnant. Submitted in G1.
