Gross Description

A. Received in formalin labeled with the patient's name and
"left distal ureter margin FS" is a gray-tan frozen section
tissue fragment measuring 0.7 x 0.5 cm. Wrapped and entirely
submitted in A1.

B. Received in formalin labeled with the patient's name and
"right distal ureter margin FS" is a gray-tan frozen section

Prepared for 

tissue fragment measuring 0.9 x 0.5 cm. Wrapped and submitted in B1.

C. Received in formalin labeled with the patient's name and "bladder and prostate" is a bladder with attached prostate with an overall dimension of 15 x 14 x 8 cm. The bladder measures 7 x 5 x 6.5 cm. The right seminal vesicle is 3 x 1.5 cm. The right vas is 6 x 0.4 cm. The left seminal vesicle is 3 x 1.5 cm and the left vas is 5 x 0.4 cm. The stump of the right ureter is 1 x 0.5 cm. The stump of the left ureter is 1 x 0.5 cm. The right side of the prostate has been previously inked in blue, left side of the prostate has been previously inked in black. The prostatic apical margin is shaved and the specimen has been previously opened anteriorly prior to fixation. The bladder has gray-tan mucosa and is remarkable for a gray-brown, friable, necrotic mass involving the entire bladder and measuring 7 x 5.5 x 5 cm. Sectioning through the tumor appears to involve the muscularis and no lymph nodes were grossly identified. The specimen is represented as follows: the distal urethral margin=C1; right trigone=C2-C3; anterior wall=C4; lateral wall=C5; posterior wall=C6; dome=C7; left trigone=C8-C10; left lateral wall=C11-C13; left posterior wall=C14-C19; right prostate from apex to base=C20-C21; right seminal vesicle and vas deferens =C22; left prostate from apex to base=C23-C24; left seminal vesicle and vas deferens=C25.

D. Received in formalin labeled with the patient's name and "left pelvic lymph nodes" consist of yellow-tan, fibroadipose tissues measuring 4.5 x 4 x 4 cm. Five lymph nodes are grossly identified. The largest measures 2 x 1 cm and the smallest measures 0.9 x 0.4 cm. The specimen is submitted as follows: one lymph node bisected=D1; one lymph node bisected=D2; one lymph node bisected=D3; one lymph node bisected=D4; one lymph node bisected=D5.

E. Received in formalin labeled with the patient's name and "right pelvic lymph node" is yellow-tan, fibroadipose tissue measuring 4.5 x 4 x 2.5 cm. Four lymph nodes are grossly identified. The largest measures 1.7 x 1 cm and the smallest measures 1 x 1 cm. Submitted as follows: one lymph node bisected=E1; one lymph node bisected=E2; one lymph node bisected=E3; and one lymph node serially sectioned and entirely submitted=E4-E5.;
