

DIAGNOSIS

(A) BLADDER TUMOR:

UROTHELIAL CARCINOMA, HIGH GRADE (GRADE 3), INVASIVE INTO LAMINA PROPRIA AND STRONGLY SUSPICIOUS FOR FOCAL INVASION INTO MUSCULARIS PROPRIA. (SEE COMMENT)

COMMENT

The tumor focally involves small bundles of smooth muscle tissue. Multiple additional deeper levels were examined. Although not definitive, the tumor is strongly suspicious for focal invasion into the muscularis propria. If clinically indicated, a rebiopsy may be considered for tumor staging.

T2 malignancy for second opinion - no treatment - same primary.

h

GROSS DESCRIPTION

(A) BLADDER TUMOR - Multiple fragments of tan-pink to gray-white, soft, rubbery tissue (2.5 x 2.2 x 0.5 cm) that is submitted entirely in A.
