SPECIMEN

Bladder TURT.

CLINICAL DETAILS

Previous G3 pTa bladder tumour. Now 2 lesions.

1 papillary at bladder neck and 1 at the dome of the bladder.

MACROSCOPY

Four pieces of tissue, the largest 6 mm.

MICROSCOPY

Please note only one specimen received.

Grade:

3 poorly differentiated

Growth pattern:

Papillary

Type:

Transitional cell carcinoma.

Muscularis propria:

Present

Stromal invasion:

The basal part of the tumour is fragmented, with individual cells appearing to invade the superficial part of the lamina propria; this may be artefactual but early stromal invasion cannot be excluded.

Vascular channel invasion:

Not identified

Background urothelium:

Flat urothelium is present which is not dysplastic.

SUMMARY

Bladder, transitional cell carcinoma G3, equivocal stage.
